Respected sir

hello sir , me and my family are living on the ground floor . our window is not accessible to wind or sunlight due to this structure which stands in the middle of it. That structure is not on the building property and is on the owner of that property but we firmly believe that he does not have the legal rights to build that structure . This structure is built with iron columns (height of 2 floors). This has been going on for a year and half . but now the owner is trying to exceed iron columns into building property. Due to the increase in that structure we are 90 % blocked from sunlight and wind. This structure built with iron columns can also fall on someone and feels dangerous.we request you to please take action on this . Also the society has already complained but he did not respond to it .

address: 1 jay apartment , gupte road , dombivli west,vishnu nagar , 421202
phone number: 9819997648

we believe that you could help us with this problem , Thanking you

this are the images of that structure
